Summary

Hello LinkedIn Network!

I am a MERN stack developer that specializes in developing dynamic and scalable web applications using React, Node.js, and MongoDB.

With a full year of experience in full-stack web development and one-year total as freelance web developer, I bring to the table a broad skill set.

With this having been said, my understanding for front-end and back-end development is strong while at the same time having an instinct for creating efficient data structures. My passion is learning new technologies and solving complex problems that keep me up-to-date with the industry's latest trends and best practices.

Excellent communication skills along with collaboration are things I can proudly boast about as a team player. I am devoted to quality work delivery that consistently exceeds expectations.

I'm actively looking for fresh #opportunities where my abilities and expertise will enable me to be valuable to an institution. If you're searching for outcome-oriented professional with proven record, don't hesitate to contact me should you have any query or need additional clarifications.

Email: sagarsharmatech00@gmail.com

Thank you for considering me for your team! Let's connect and explore how I can contribute to your organization's success.

Experience

Hello Mentor
Full-stack Developer
September 2023 - Present (10 months)
Bengaluru, Karnataka, India

During my tenure at Exzellenz Career Shapers Pvt Ltd, I served as a MERN
Stack Developer. In this role, I was responsible for front-end development
and the creation of APIs using Node.js and MongoDB. My tasks involved
implementing various features and functionalities, contributing to the overall
architecture of web applications, and ensuring seamless integration between
the front end and back end systems. This experience enhanced my skills
in full-stack development within the MERN environment, fostering a deep
understanding of modern web technologies.

VWG Pvt. Ltd.
Full-stack Developer
May 2023 - August 2023 (4 months)
Banglore

During my internship at VWG Pvt. Ltd, I had the opportunity to work as a
MERN Stack Developer. During this time, I focused on front-end development
tasks and gained experience in creating APIs using Node.js and MongoDB. My
responsibilities included assisting with feature implementation, learning about
web application architecture, and collaborating with the development team.
This internship was a valuable learning experience that deepened my skills in
full-stack development within the MERN stack and modern web technologies.

Alphaworldtech
Full Stack Engineer
January 2022 - December 2022 (1 year)
Remote

Led the development of robust web applications at AlphaWorldTech as a
Full Stack Developer in MERN technology. Responsible for conceptualizing,
designing, and implementing features, ensuring seamless functionality across
the entire stack. Collaborated with cross-functional teams to meet project
requirements and deliver high-quality software solutions. Contributed to
system architecture, optimized performance, and implemented best practices.
Successfully tackled challenges and consistently met deadlines in a dynamic
development environment. #FullStackDevelopment #MERN #WebApplications
#CodeQuality
